

Take The Color Quiz

Do you share an amazing ability with people around the world, regardless of race, culture, ethnicity, etc.?

Answer: Yes, all of our brains respond to the same color schemes. **Not Convinced?**

Try this simple test:

*Stare hard at the **red dot** for **20 seconds**. Then quickly stare at that blank dot. In a moment, the hazy ghost of red's harmonious twin (**greenish blue**) will fill the space.*

Amazed? It works for any color!

After staring at a **blue dot**, for example, your brain will want to produce its opposite (complementary) color. Try other colors, too.

We are All hardwired for color harmony!
